Experienced in developing reusable UI components, integrating APIs, and working on practical projects including AI-based tools and web extensions. Focused on writing clean, maintainable code and continuously improving through real-world development experience.

SKILLS

Javascript	Typescript
React	HTML5
CSS	SCSS
Tailwind CSS	Redux
Tanstack Query	REST APIs
Responsive Design	Git

WORK HISTORY

Freelance Frontend Developer, 08/2025 - Current

Remote – Remote

- Delivered **3+ small web projects** using React and TypeScript, focusing on responsive layouts and usability
- Built reusable UI components to speed up development across projects
- Integrated REST APIs to display and manage dynamic data
- Customized existing websites by fixing UI issues and improving responsiveness
- Managed project tasks independently, including implementation, testing, and basic deployment

Front-End Developer, 11/2024 - 08/2025

Tasin Halka – Ashgabat, Turkmenistan

- Developed a **custom component library (20+ reusable components)** to improve UI consistency and development speed

- Contributed to a route optimization application calculating the **shortest path across multiple transportation modes (helicopter, drones, car, bicycle, walking) using AI**
- Worked on **Formix AI**, a Chrome extension for automated form filling using AI, including extracting data from text and PDF files and mapping it to form fields
- Implemented responsive UI features and integrated them with backend APIs

Junior Front End Developer, 10/2022 - 11/2024

Tasin Halka – Ashgabat, Turkmenistan

- Developed **40+ responsive landing pages** using HTML, SCSS, CSS, JavaScript, Bootstrap and Material UI, ensuring consistent layouts across devices
- Built **5+ React applications**, gaining experience with component-based development and basic state management
- Translated design mockups into production-ready UI with attention to layout accuracy and responsiveness
- Integrated REST APIs to display dynamic content in web applications
